FINAL 2004 REGIONAL TRANSPORTATION PLAN AMENDMENT #3

June 7, 2007

SOUTHERN CALIFORNIA

ASSOCIATION of GOVERNMENTS

IMISSION STATEMENT REGIONAL COUNCIL MEMBERS

Leadership Vision Progress

Leadership, vision and progress which promote economic growth, personal well-being, and livable communities for all Southern Californians.

The Association will accomplish this Mission by:

- Developing long-range regional plans and strategies that provide for efficient movement of people, goods and information; enhance economic growth and international trade; and improve the environment and quality of life.
- Providing quality information services and analysis for the region.
- Using an inclusive decision-making process that resolves conflicts and encourages trust.
- Creating an educational and work environment that cultivates creativity, initiative, and opportunity.

Funding: The preparation of this report was financed in part through grants from the United States Department of Transportation – Federal Highway Administration and the Federal Transit Administration – under provisions of the Transportation Equity Act for the 21st Century (TEA-21). Additional financial assistance was provided by the California State Department of Transportation.

RESOLUTION No. 07-488-1

RESOLUTION OF THE SOUTHERN CALIFORNIA ASSOCIATION OF GOVERNMENTS APPROVING FINAL AMENDMENT NO. 3 TO THE 2004 REGIONAL TRANSPORTATION PLAN (2004 RTP), FINAL AMENDMENT NO. 8 TO THE 2006 REGIONAL TRANSPORTATION IMPROVEMENT PROGRAM (2006 RTIP) AND THE CORRESPONDING ADDENDUM TO THE 2004 RTP PROGRAM ENVIRONMENTAL IMPACT REPORT AND CONFORMITY DETERMINATION

WHEREAS, the Southern California Association of Governments (SCAG) is the federally designated Metropolitan Planning Organization (MPO) pursuant to 23 U.S.C. §134(a) and (g) for the Counties of Imperial, Los Angeles, Orange, Riverside, San Bernardino and Ventura, and as such, is responsible for the preparation, adoption and regular revision of the Regional Transportation Plan (RTP) and the Regional Transportation Improvement Program (RTIP) pursuant to 23 U.S.C. §§134(g) 49 U.S.C. §5303(f) and 23 C.F.R. §450.312;

WHEREAS, also pursuant to Section 130004 of the California Public Utilities Code, SCAG is the designated Regional Transportation Planning Agency and, as such, is responsible for preparation of both the RTP and RTIP under California Government Code §§ 65080 and 65082 respectively;

WHEREAS, 23 U.S.C. § 134(h)(3)(C) and 23 C.F.R. § 450.324(f)(2) requires the 2006 RTIP to be consistent with the 2004 RTP;

WHEREAS, 23 U.S.C. § 134(a), 49 U.S.C. § 5301 et seq., 23 CFR § 450.312, and 49 CFR § 613.100 require SCAG, as the designated MPO, to maintain a continuing, cooperative and comprehensive transportation planning process in its development of the RTP and RTIP;

WHEREAS, pursuant to 23 C.F.R. §450.316(b)(1)(iv), SCAG must provide adequate public notice of public involvement activities and time for public review and comment at key decision points, including approval of plans and transportation improvement programs (the applicable comment period shall be at least 30 days for the plan, transportation improvement program and major amendment(s));

WHEREAS, on April 1, 2004, SCAG approved and adopted the 2004 RTP, and on June 7, 2004, the federal agencies found that the 2004 RTP conforms to the applicable State Implementation Plan (SIP);

WHEREAS, on July 27, 2006, SCAG approved and adopted the 2006 RTIP, and on October 2, 2006, the federal agencies found that the 2006 RTIP conforms to the applicable SIP;

WHEREAS, on February 2, 2006, SCAG approved and adopted an Amendment to the 2004 RTP to replace the CenterLine and Yorba Linda Metrolink Station Transportation Control Measures (TCMs) with four substitute TCMs and to revise the scope of the Foothill Transportation-Corridor South/SR-241 toll road project;

Resolution #07-488-1

WHEREAS, on July 27, 2006, SCAG approved and adopted a second Amendment to the 2004 RTP to add the sbX E Street bus rapid transit project;

WHEREAS, on October 2, 2006, the federal agencies found that the 2004 RTP, as amended on February 2, 2006 and July 27, 2006, conforms to the applicable SIP;

WHEREAS, on November 7, 2006, the voters of the state of California approved Proposition 1B, the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006, and this Act created a Corridor Mobility Improvement Account (CMIA) to fund performance improvements on highly congested highway corridors, and this Act also created the Transportation Facilities Account (TFA) to augment funding for the State Transportation Improvement Program (STIP);

WHEREAS, on February 28, 2007, the California Transportation Commission (CTC) adopted a \$4.5 billion program of projects for the CMIA, and on June 7, 2007, the CTC intends to take action on a \$2 billion augmentation to the 2006 STIP, and together these actions result in new projects and revisions to existing projects in the adopted 2004 RTP and 2006 RTIP;

WHEREAS, SCAG has also received requests from the local county transportation commissions and California Department of Transportation (Caltrans) for other project additions or modifications to the 2004 RTP and 2006 RTIP;

WHEREAS, on January 30, 2007, February 27, 2007, March 27, 2007, and April 24, 2007, the proposed RTP and RTIP amendments to address the CTC actions and local requests were discussed at the Transportation Conformity Working Group, SCAG's forum to support interagency coordination to help improve air quality and maintain transportation conformity in Southern California;

WHEREAS, on or about April 1, 2007, SCAG staff prepared the "Draft 2004 RTP Amendment #3" and the "Draft 2006 RTIP Amendment #8" ("RTP/RTIP Amendments"), including the staff findings, in order to address the CTC action and local requests;

WHEREAS, the conformity findings included in the "Draft 2004 RTP Amendment #3" are also applicable to the "Draft 2006 RTIP Amendment #8";

WHEREAS, on May 3, 2007, SCAG's Executive Committee (EC) approved the release of the Draft RTP/RTIP Amendments for a 30-day public review and comment period;

WHEREAS, a Notice of Availability and Public Hearing was posted on the SCAG website at www.scag.ca.gov on May 3, 2007 and published in major newspapers in the six-county region, the Draft RTP/RTIP Amendments were made available on the SCAG website, and copies were provided for review at SCAG and at public libraries throughout the region;

WHEREAS, a public hearing for the Draft RTP/RTIP Amendments was held at SCAG on May 21, 2007;

WHEREAS, to the extent that SCAG has received any written comments on the Draft RTP/RTIP Amendments, those comments have been responded, and those comment along with responses are summarized in the Final RTP/RTIP Amendments;

WHEREAS, amendments to the RTP must be consistent with the December 1999 RTP Guidelines and 2003 Supplement to the RTP Guidelines prepared by the California Transportation Commission;

WHEREAS, SCAG has complied with all applicable federal and state requirements in developing the RTP/RTIP Amendments, including, but not limited to:

- (1) TEA 21 (23 U.S.C. § 134, et seq.)
- (2) The Metropolitan planning regulations at 23 C.F.R. § 450 et seq;
- (3) Government Code Section 65080 et.seq;
- (4) Sections 174 and 176(c) and (d) of the Clean Air Act [42 U.S.C. §§ 7504, 7506(c) and (d)];
- (5) The Environmental Protection Agency (EPA) Transportation Conformity Rule at 40 CFR Parts 51 and 93 (August 15, 1997) and all associated courts rulings and federal guidance.
- (6) Title VI of The Civil Rights Acts of 1964 and the Title VI assurance executed by each State under 23 U.S.C. § 324 and 29 U.S.C. § 794;
- (7) Title II of the American with Disabilities Act of 1990 (42 U.S.C. § 120001 et seq.) and U.S. DOT regulations "Transportation for Individuals with Disabilities" (49 CFR Parts 27, 37, and 38); and
- (8) The Department of Transportation's Final Environmental Justice Order, enacted pursuant to Executive Order 12898, which seeks to avoid disproportionately high and adverse impacts on minority and low-income populations with respect to human health and the environment and requirements set forth in U.S.D.O.T. Order 5610.2, FHWA Order 6640.23 and 23 C.F.R. § 450.316(b)(ii).

WHEREAS, pursuant to Section 176(c) of the Federal Clean Air Act (42 U.S.C. §7506(c)), no project may receive Federal funding unless it comes from an RTP which has been found to conform to the applicable SIP;

WHEREAS, as required by 23 C.F.R. §450.322(d), in nonattainment and maintenance areas for transportation-related pollutants, SCAG, the FHWA and the FTA must make a conformity determination on any RTP/RTIP updates or amendments in accordance with the requirements of the Federal Clean Air Act (42 U.S.C. §7401 et seq.) and the Environmental Protection Agency (EPA) conformity regulations found at 40 C.F.R. Part 51;

WHEREAS, with approval of the RTP/RTIP Amendments, all South Coast Air Resolution #07-488-1 Page 3

Basin TCM projects in the federally approved conforming 2004 RTP and 2006 RTIP are given funding priority and are on schedule for timely implementation;

WHEREAS, the 2004 RTP and 2006 RTIP remain financially constrained for all fiscal years after the project additions and revisions described in the RTP/RTIP Amendments;

WHEREAS, SCAG is required to comply with the California Environmental Quality Act ("CEQA") [Cal. Pub. Res. Code § 21000 et seq.] in amending the RTP;

WHEREAS, SCAG adopted and certified the Program Environmental Impact Report (PEIR) to the 2004 RTP in April 2004;

WHEREAS, when an EIR has been certified and the project is modified or otherwise changed after certification, then additional CEQA review may be necessary;

WHEREAS, an Addendum may be prepared by the Lead Agency that prepared the original EIR if some changes or additions are necessary, but none of the conditions have occurred requiring preparation of a Subsequent EIR (CEQA Guidelines Section 15164(a), Cal. Administrative Code, Title 14);

WHEREAS, for the reasons set forth in the Addendum to the 2004 PEIR, SCAG determined that an Addendum to the 2004 PEIR is the appropriate CEQA document because the proposed changes to the 2004 RTP do not meet the conditions of CEQA Guidelines Section 15162(a) for preparation of a Subsequent EIR;

WHEREAS, SCAG prepared an Addendum to the 2004 PEIR, which is included in the 2004 RTP Amendment #3, in order to address the modifications to the 2004 RTP due to the CMIA program, STIP Augmentation, and requests from the local agencies;

WHEREAS, SCAG determined that adoption of the proposed RTP Amendment #3 would not result in either new environmental significant effects or a substantial increase in the severity of previously identified significant effects;

NOW, THEREFORE BE IT RESOLVED that:

- 1. The Southern California Association of Governments finds and adopts as follows:
 - a. The 2004 RTP Amendment #3 and 2006 RTIP Amendment #8 comply with all applicable federal and state requirements, including the federally approved SIPs;
 - Upon approval of the RTP/RTIP Amendments, all TCM projects in the South Coast Air Basin and Ventura County portion of the South Central Coast Air Basin in the federally approved conforming 2004 RTP and 2006 RTIP are given funding priority and are on schedule for timely implementation;

- c. The 2004 RTP and 2006 RTIP as amended have been found to conform to the applicable SIP in accordance with the Clean Air Act and EPA conformity regulations; and
- d. Proposed changes to the 2004 RTP as expressed in the 2004 RTP Amendment #3 are not substantial changes which would require major revisions to the PEIR, and the Addendum to the PEIR for the 2004 RTP fulfills SCAG's requirements for CEQA compliance, thus, no further CEQA document is required.
- Incorporating all the foregoing recitals and findings, the Regional Council hereby approves and adopts the Final 2004 RTP Amendment #3 and Final 2006 RTIP Amendment #8, including the PEIR Addendum and conformity findings.
- 3. SCAG's Executive Director or his designee is authorized to transmit the RTP/RTIP Amendments and associated conformity finding to the Federal Transit Administration and the Federal Highway Administration to make the final conformity determination in accordance with the Federal Clean Air Act and EPA Transportation Conformity Rule at 40 C.F.R. Parts 51 and 93.

Approved at a regular meeting of the Regional Council of the Southern California Association of Governments on this 7th day of June 2007.

INTRODUCTION

The Southern California Association of Governments (SCAG) is the designated Metropolitan Planning Organization (MPO) for six counties in Southern California, including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura. As the MPO, SCAG is required to develop and update the Regional Transportation Plan (RTP). The RTP is a long-range plan that identifies multi-modal regional transportation needs and investments out to the plan horizon year of 2030.

SCAG adopted the current operating 2004 RTP on April 1, 2004 (resolution #04-451-2). The 2004 RTP was subsequently amended on February 2, 2006 (resolution #06-471-3), and a second time on July 27, 2006 (resolution #06-477-1). The RTP was developed in a comprehensive, cooperative, and continuing process that involved a broad spectrum of stakeholders including federal, state and local agencies, as well as members of the public, as required under the Transportation Equity Act for the 21st Century (TEA-21).

The replacement of TEA-21 with the Safe, Accountable, Flexible, Efficient Transportation Act: A Legacy for Users (SAFETEA-LU) in 2005 established a number of new requirements for MPO's with respect to developing and updating the RTP. Pursuant to the new SAFETEA-LU requirements, SCAG has proceeded with due diligence to bring the existing 2004 RTP into compliance. As such, the Administrative Amendment to the 2004 RTP (Gap Analysis) that was adopted by SCAG on March 1, 2007 with the intent to bring the current RTP into compliance with SAFETEA-LU. The Administrative Amendment to the 2004 RTP is currently under review by FHWA/FTA. Given that the current RTP has not been deemed SAFETEA-LU compliant at the time of completing this document, this amendment should be reviewed under the old statute (TEA-21). The statutory deadline for certifying an amendment to the existing RTP is July 1, 2007.

This third amendment to the 2004 RTP is in response to recent developments in California's transportation funding allocations. Moreover, the Amendment is intended to ensure that all the projects included can move forward in a timely manner. In November of 2006, the voters of California approved Proposition 1B, a \$20 billion state bond measure to support much needed transportation infrastructure improvements throughout the state. \$4.5 billion was set aside from Proposition 1B for the Corridor Mobility Improvement Account (CMIA), which focuses on improving mobility, connectivity and safety on major California highways. This RTP Amendment is in part a response to the CMIA program that was adopted by the California Transportation Commission (CTC) on February 28, 2007. While most of the projects approved for CMIA funding are consistent with the 2004 RTP, inevitably, there are a number of projects that require amendment to the current RTP. This amendment also includes non-CMIA projects that are time sensitive in nature. These projects are funded through a variety of existing sources, including the Highway Bridge Rehabilitation and Replacement (HBRR) Program; the State Transportation Improvement Program Augmentation funds (STIP Augmentation), and the State Highway Operation and Protection Program (SHOPP).

The purpose of this document is to identify the specific details of the 2004 RTP Amendment and to ensure that the proposed changes are consistent with federal and state requirements, including the TEA-21 planning requirements and the Transportation Conformity Rule. All associated analyses for the Amendment are incorporated into this document. It is also important to note that the conformity findings included in this document are applicable for the 2004 RTP Amendment as well as the 2006 Regional Transportation Implementation Program (RTIP) Amendment # 06-08.

PROJECT DESCRIPTIONS

The project changes proposed under this Amendment are presented in this document for Los Angeles, Orange, Riverside, San Bernardino and Ventura counties. The reasons for amending each of the projects can be broadly categorized as follows:

- Project is new and currently not in the 2004 RTP
- Project currently exists in the 2004 RTP but,
 - o has a revised scope,
 - o has a revised schedule,
 - o has a change in total cost, or
 - o includes any combination of the above changes.

Descriptions of major projects for each of the counties are provided to highlight the general scope of this Amendment. The locations of projects are depicted in Exhibits 1-5 for ready reference. Project Summary Tables are organized to provide a complete list of the projects for each county and to document the details of the changes from the current plan. In addition, the summary tables are also intended to illustrate a before and after picture for each of the projects.

LOS ANGELES COUNTY

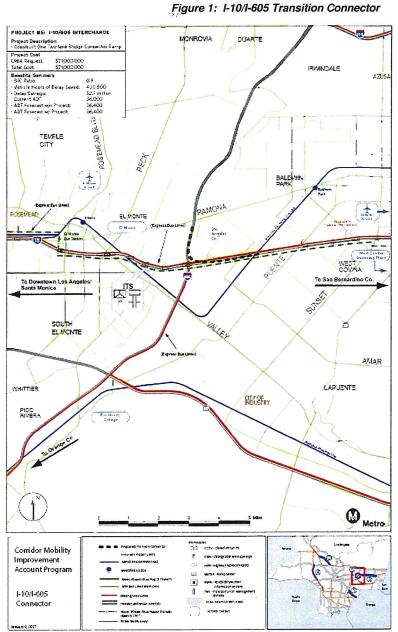

Major Regional Projects

Interstate 10/605 Transition Connector from SB I-605 to EB I-10

New Project

RTP/RTIP Project No. 1M07A Estimated Completion Date: 2013 Estimated Project Cost: \$71 M

The project will construct the flyover connector from the southbound I-605 to the eastbound I-10. The planned flyover direct connector (southbound I-605 to eastbound I-10) will replace the existing, shared atgrade connector and result in the elimination of the weaving conflict. The new connector is intended to eliminate weaving movements on the existing shared connector, reduce queuing on the westbound I-10 and southbound I-605 traffic and enhance the safety and operation of the interchange by reducing accidents¹. The I-10/I-605 Transition Connector project is depicted in Figure 1.

Project Map courtesy of Metro; accessed 3/13/07 http://www.metro.net/projects_programs/cmia.htm

3

I-5 HOV Lane from SR-134 to SR-170

RTP/RTIP Project No. LA000358 CTC Adopted CMIA Project Estimated Project Cost: \$608 M

Current Completion Date: 2010. Revised Completion Date: 2012

The improvements for this corridor include two projects. Project 1 is a 9.7 mile project of HOV lanes in each direction along the I-5 freeway. Project 2 is a 0.7 mile segment of HOV lanes in each direction along the I-5 freeway. Project 2 also includes modification of the Empire Avenue intersection to a full diamond interchange, the re-alignment and elevation of the railroad adjacent to the freeway and the construction of a railroad grade separated crossing at Buena Vista. These two projects are scheduled to be constructed in four phases. The I-5 Carpool Lane from SR-134 to SR-170 is depicted in Figure 2.

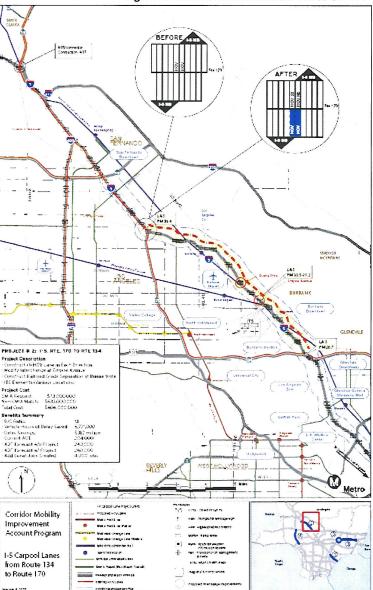

Figure 2: I-5 HOV Lanes from SR-134 to SR-170

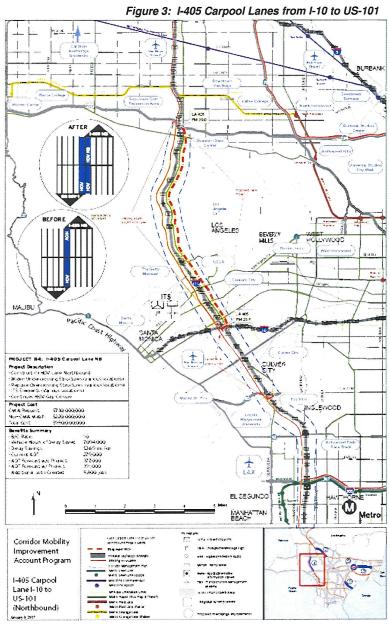

Project Map courtesy of Metro; accessed 3/13/07 http://www.metro.net/projects_programs/cmia.htm

I-405 Carpool Lanes from I-10 to US-101

RTP/RTIP Project No. LA0B408 CTC Adopted CMIA Project Estimated Project Cost: \$950 M

Current Completion Date: 2016 Revised Completion Date: 2013

I-405 is major regional a transportation corridor serving as the backbone of the Southern California transportation network. I-405 (in the project area) serves commuters in San Fernando Valley to major urban centers of Los Angeles and Santa Monica, well as Los Angeles International Airport. This section of I-405 is heavily congested. Existing traffic in the project area is mostly stop and go throughout the day. This project will provide a continuous 10 miles HOV lane in LA County from I-10 to US-101. This project will ease congestion, improve mobility by moving twice as many people as a regular traffic lane, decrease commute times for all drivers, enhance traffic safety, reduce air pollution and promote ridesharing. Metro and the public support this project². The I-405 Carpool Lanes from I-10 to US-405 is depicted in Figure 3.

Major Regional Projects

SR-22/I-405/I-605 HOV Connector with ITS Elements

RTP/RTIP Project No. 2H01145/ORA000193 CTC Adopted CMIA Project

Estimated Project Cost: \$400 M Current Completion Date: 2015 Revised Completion Date: 2013

Revised Scope: The existing RTP does not include the second HOV lane on I-405. The Amendment adds the

second HOV lane.

The project will construct direct HOV connectors from SR-22 to I-405, between Seal Beach Blvd. and Valley View St. and from I-405 to I-605, between Katella Ave. and Seal Beach Blvd., with a second HOV lane in each direction on I-405 between the two direct connectors. Included in the proposed project is the installation of fiber optic cables in new conduits and closed circuit television (CCTV) on I-405 between SR-22 and ORA/LA County Line, on SR-22 between I-405 and LA County Line, and on I-605 between I-405 and Katella Avenue. See *Map 2 (pg 10)*.

SR-91 Widening from Lakeview Avenue to Weir Canyon Road

RTP/RTIP Project No. 2M04121 CTC Adopted CMIA Project Estimated Project Cost: \$96 M Current Completion Date: 2010 Revised Completion Date: 2014

The purpose of this project is to address the existing operational deficiency along SR-91, between SR-55 and SR-241. The project will add one mixed flow lane on EB SR-91 between the SR-91/55 connector (PM 9.13) and east of the Weir Canyon Road IC (PM 15.35), and on WB SR-91 between the Weir Canyon Road IC (PM 15.59) and the Imperial Highway IC (PM 11.43). This project will also modify the WB on-ramps from the Lakeview Avenue IC with the intention of improving existing merging conflicts. See *Map 2 (pg 10)*.

EB SR-91 Lane Addition from SR-241 to SR-71

RTP/RTIP Project No. 2M01123/ORA120336

CTC Adopted CMIA Project Estimated Project Cost: \$81 M Current Completion Date: 2015 Revised Completion Date: 2011

This project will add one EB lane from the SR-241/SR-91 IC (PM15.9) to the SR-71/SR-91 IC (Riverside PM 2.9), and widen all EB lanes and shoulders to standard widths. The project involves both Districts 8 and 12, and is intended to address safety concerns, improve highway capacity, operations and improve regional circulation overall. See *Map 2 (pg 10)*.

Major Regional Projects

I-215 HOV Lane Additions from Nuevo to Box Springs

New Project

RTP/RTIP Project No. 3H07A Completion Date: 2013

This project will construct one HOV lane in each direction on I-215 from Nuevo to Box Springs. See *Figure 7*.

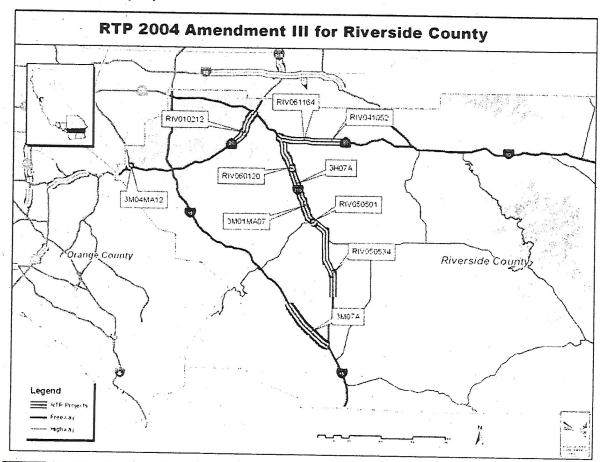

SR-91 HOV Lane Addition from Adams to SR-60/l-215 IC

RTP/RTIP Project No. RIV010212 CTC Adopted CMIA Project

Current Completion Date: 2013 Revised Completion Date: 2014

This project will add HOV lanes on SR-91 from Adams to the SR-60/I-215 IC. It will also include the addition of auxiliary lanes from Madison to Central, bridge widening and replacements, EB/WB braided ramps, IC modifications/reconstruction and sound retaining walls. See *Map 3*.

FISCAL IMPACT

The 2004 RTP Amendment includes both changes to existing projects as well as the addition of new projects. The fiscal impact of each individual project is discussed in the above summary tables under the fiscal impact column for each respective county.

The increase in project cost totals \$2.8 billion, which is broken down by county in the table below (first row). This increase is being funded by the identified sources which are in addition to 2004 RTP forecasted revenues, also broken down by county in the table below. Please note that in some cases identified funding was greater than the total cost increase for certain counties (see last row in table below).

(Amounts in \$1,000's)	Los Angeles	Orange	Riverside	San Bernardino	Ventura	SCAG Region

Private Funding	\$6,200	\$0	\$0	\$0	\$0	\$6,200
County Sales Tax Funding	\$108,921	\$100,900	\$352,829	\$0	\$0	\$562,650
Future CTC Commitment Funding	<u>\$71,000</u>	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>	\$71,000
Funding Balance	\$198	\$111,740	\$107,493	\$51,524	\$0	\$270,955

Based on review of the funding considerations for each project documented herein, SCAG finds that the amendment does not adversely impact the financial constraint of the 2004 RTP. The Plan remains financially constrained.

PAGE INTENTIONALLY LEFT BLANK

TRANSPORTATION CONFORMITY

Transportation conformity is required under the federal Clean Air Act to ensure that federally supported highway and transit project activities are consistent with ("conform to") the purpose of the State Implementation plan (SIP). Conformity to the purpose of the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant National Ambient Air Quality Standards. Conformity applies to non-attainment and maintenance areas for the following transportation-related criteria pollutants: ozone, particulate matter (PM2.5 and PM10), carbon monoxide (CO), and nitrogen dioxide (NO2).

Federal and state regulations require that a transportation conformity process must be undertaken by SCAG as the Metropolitan Planning Organization (MPO) of the region prior to the 2004 RTP/2006 RTIP Amendments' approval and conformity finding by the Regional Council. This includes interagency consultation, release of the draft document for public review and comment, responses to comments, and a public meeting of the Regional Council prior to final action.

The findings of the conformity determination for the 2004 RTP/2006 RTIP Amendments are presented below. Details of the regional emissions analysis and timely implementation of transportation control measures (TCMs) which support the conformity determination follow the findings.

CONFORMITY FINDINGS

SCAG's findings for the approval of the 2004 RTP/2006 RTIP Amendments are as follows:

✓ Consistency with 2004 RTP / 2006 RTIP Test

Statement of Fact: Inclusion of the amendments in the 2004 RTP would not change any other policies, programs and projects which were previously approved by the federal agencies on June 7, 2004.

Statement of Fact: Inclusion of the amendments in the 2006 RTIP would not change any other projects which were previously approved by the state and federal agencies on October 2, 2006.

Finding: The 2004 RTP/2006 RTIP Amendments are consistent with the 2004 RTP and 2006 RTIP, and meet all federal and state requirements and regulations.

Regional Emissions Test

Finding: The Amended 2004 RTP/ 2006 RTIP regional emissions for ozone precursors are consistent with all applicable emissions budgets for all milestone, attainment, and planning horizon years in the South Coast Air Basin and Ventura County portion of South Central Coast Air Basin.

Finding: The Amended 2004 RTP/2006 RTIP regional emissions for direct PM10 and precursors are consistent with all applicable emissions budgets for all milestone, attainment, and planning horizon years in the South Coast Air Basin.

Finding: The Amended 2004 RTP/2006 RTIP regional emissions for CO are consistent with all applicable emissions budgets for all milestone, attainment, and planning horizon years in the South Coast Air Basin.

Finding: The Amended 2004 RTP/2006 RTIP regional emissions for NO2 are consistent with all applicable emissions budgets for all milestone, attainment, and planning horizon years in the South Coast Air Basin.

Finding: The Amended 2004 RTP/2006 RTIP regional emissions for direct PM2.5 and NOx precursor are less than the base year (2002) for the 24-hour and the annual standards in the in the South Coast Air Basin.

✓ <u>Timely Implementation of TCMs Test</u>

Finding: The past obstacles to timely implementation of two TCMs identified in the amendments have been described and overcome, and all state and local agencies with influence over approvals or funding are giving maximum priority to approval or funding of these TCMs.

✓ Financial Constraint Test

Finding: All projects listed in the 2004 RTP and 2006 RTIP, including the proposed amendments, are financially constrained for all fiscal years. Fiscal constraint is analyzed in the Fiscal Impact section of this report.

✓ Interagency Consultation and Public Involvement Test

Finding: The 2004 RTP/2006 RTIP Amendments complies with all federal and state requirements for interagency consultation and public involvement. SCAG has consulted with the respective transportation and air quality planning agencies. The proposed RTP/RTIP Amendment was discussed at the Transportation Conformity Working Group (which includes representatives from the respective air quality and transportation planning agencies) on 4 occasions (January 30, 2007, February 27, 2007, March 27, 2007, and April 24, 2007). In addition, the 2004 RTP/2006RTIP Amendment has been released for a 30 day public comment period.

Regional Emissions Analysis

The SCAG region is comprised of the Ventura County portion of the South Central Coast Air Basin, the South Coast Air Basin, the Mojave Desert Air Basin, and Salton Sea Air Basin. Except for one project amendment located in Ventura, all of the proposed projects included in this RTP/RTIP amendment are located within the South Coast Air Basin. Emissions changes in the Mojave Desert and Salton Sea Air Basins due to the proposed amendment are negligible and not included in this report.

Timely Implementation of TCMs

Pursuant to the conformity rule Section 93.113(c)(1), if a TCM is behind the schedule established in the applicable implementation plan, the MPO and DOT must determine that past obstacles to implementation of the TCM have been identified and have been or are being overcome, and that all State and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding of TCMs over other projects within their control.

The 2004 RTP/ 2006 RTIP Amendments include revised schedules for two TCM projects as shown in the following table.

Project ID	Description	Schedule Change
LA000358	Route 5 from Route 134 to Route 170 - HOV lanes (8 to 10 lanes)	From 2010 to 2011
713 (San Bernardino)	I-215 Corridor North from Route 10 to Route 215 - add 2 HOV lanes and 2 mixed flow lanes (one in each direction) and operational improvements including auxiliary lanes and braided ramps	From 2010 to 2013

The major obstacles and steps to overcome the delays are described below.

Route 5 (ID# LA000358)

- On September 29, 2006, Governor Schwarzenegger signed into law SB 1210 Eminent Domain, which became effective January 1, 2007. SB 1210, authored by Senator Tom Torlakson (D-Antioch), changes certain processes that relate to the taking of property by eminent domain. Specifically, this bill:
 - Prevents issuance of a pre-judgment order of possession without prior notice and an opportunity to respond for the property owner or occupants.
 - Requires an entity seeking to take property by eminent domain to offer to pay the property owner's reasonable costs in ordering an independent appraisal of the property.
 - Defines litigation expenses to include reasonable attorney's fees and reasonable expert witness and appraiser fees.
 - Prohibits a redevelopment agency from exercising eminent domain over 12 years after adoption of the redevelopment plan, unless "substantial blight" exists that cannot be eliminated without eminent domain.
- Caltrans uses the power of eminent domain to acquire rights-of-way for transportation projects. As a result of the passage of SB 1210, the proposed project will not meet its originally scheduled completion date of 2010. Additional time is required for right-of-way acquisition.
- The expected construction start date is spring 2009. The completion date of the proposed project is being delayed one year, from 2010 to 2011.
- To date, the project is fully funded.

I-215 Corridor (ID# 713)

- In 2001, after preliminary engineering (30%-35% designed) and a Record of Decision issued by FHWA, the project went through a Value Analysis Study which was finalized later that same year. Recommendations from the Value Analysis study included a substantial redesign of the entire corridor but with specific attention to all of the local interchanges. As originally designed, a collector-distributor road system was to be utilized to accommodate the increase in volume at local interchanges that would result from increasing the freeway capacity from a total of three lanes in each direction to five lanes each direction. The collector-distributor design required substantial right-of-way acquisition, and the Value Analysis study recommended using a different design concept at local interchanges known as "braid-split" interchanges. This was considered to be a substantial enough design change to warrant an Environmental Reevaluation of the approved 2001 environmental document.
- The Environmental Reevaluation process required additional traffic analysis, a modified access report, community meetings, coordination with local stakeholders, and numerous discussions with both Caltrans and FHWA staff. During the Environmental Reevaluation process and due in part to the additional traffic analysis, it was concluded that rather than proceeding with a two-phase widening which would first add only the HOV lane in each direction and then later add a mixed flow lane in each direction, the Environmental Reevaluation should reflect the ultimate widening. The Environmental Reevaluation was finalized by Caltrans in November 2005 and approved by FHWA in December 2005.
- Right-of-way acquisition has proceeded on approximately 30 core parcels during the Environmental Reevaluation process; however, SANBAG/Caltrans were not permitted to proceed on nearly 200 other parcels until the Environmental Reevaluation was approved. With the approval of the Environmental Reevaluation, Caltrans is again acquiring parcels, but due to the initial delay and also to changes in State law related to parcel acquisition, the original ROW acquisition schedule has not been met.
- Assuming Caltrans meets the agreed upon right-of-way delivery dates, it is anticipated this freeway reconstruction project will begin construction by the end of 2008 with completion in late 2012.
- The project is fully funded from available revenue sources.

ADDENDUM TO THE 2004 REGIONAL TRANSPORTATION PLAN (RTP) PROGRAM ENVIRONMENTAL IMPACT REPORT (PEIR)

INTRODUCTION

This document is an Addendum to the Final Program Environmental Impact Report ("PEIR") for the 2004 Regional Transportation Plan ("RTP" or "Plan"), prepared and certified by the Southern California Association of Governments ("SCAG") on April 1, 2004. To date, there have been two project amendments and one Administrative Amendment to the 2004 RTP. The first amendment, which was adopted on February 2, 2006, involved the substitution of the CenterLine light rail and Yorba Linda Metrolink Station projects with a combination of four replacement projects, which included a bus rapid transit line, a local transit shuttle, Metrolink service improvements, and free HOV 3+ on the SR-91 Express lanes. Additionally, this involved revisions in the scope and schedule of the SR-241/Foothill South toll road extension. A second amendment, which was adopted on July 27, 2006, was requested by Omnitrans to add a bus rapid transit project, called sbX for San Bernardino Express, to San Bernardino County.

An Administrative Amendment (Gap Analysis), was prepared to bring the 2004 RTP into compliance with the planning requirements of the "Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users" ("SAFETEA-LU") (Pub. L. No. 109-59, Title VI, Section 6001(a), 119 Stat. 1839; Aug. 10, 2005). The Administrative Amendment was adopted by SCAG's Regional Council on March 1, 2007 and is currently awaiting certification by the Federal Highway Administration (FHWA).

This current RTP Amendment addresses projects proposed to be added to the RTP in response to Proposition 1B, Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006, a roughly \$20 billion transportation bond approved by California voters on November 7. 2006. One element of Proposition 1B is the \$4.5 billion Corridor Mobility Improvement Account (CMIA) program, the first commitment of funds focusing on improving mobility, connectivity and safety on major California highways. SCAG sent out a Notice of Intent to Amend the 2004 RTP on December 12, 2006 to all of the county transportation commissions and Caltrans districts with jurisdictions that fall within the six-county SCAG region.

The scope of this proposed RTP Amendment focuses on priority projects identified by the California Transportation Commission (CTC) for the SCAG region in its meeting held February 28, 2007. This RTP Amendment also includes non-CMIA projects that are time sensitive in nature. These projects are funded through a variety of existing sources including, the Highway Bridge Rehabilitation and Replacement (HBRR) Program; the State Transportation Improvement Program Augmentation funds (STIP Augmentation), and the State Highway Operation and Protection Program (SHOPP). The projects included in this amendment are either new (projects that are not included in the existing 2004 RTP) or revised (projects which appear in the existing 2004 RTP) and reflect changes to their scopes, schedules, costs, and/or any combination of the changes. These projects have been included at the request of Caltrans and a number of the county transportation commissions in the SCAG region. The county-by-

³ The Final 2004 Regional Transportation Plan Program Environmental Impact Report (SCH No. 2003061075) ("Final PEIR" or "2004 PEIR") is incorporated herein by this reference and an electronic version is available at http://scaq.ca.gov/RTPpeir2004/draft/2004/responsecomments.htm

county summary tables presented in the *Project Descriptions* section of this document provide a full description of the Amendment changes. This RTP Amendment must be certified before the July 1, 2007 deadline for SAFETEA-LU compliance in order to allow the CMIA projects to proceed towards implementation.

As the Lead Agency under the California Environmental Quality Act ("CEQA") (Cal. Pub. Res. Code Section 21000 et seq.), SCAG prepared the Final PEIR for the 2004 RTP to evaluate the potential environmental impacts associated with implementation of the 2004 RTP. The purpose of the 2004 PEIR is to identify the potentially significant environmental impacts associated with the implementation of the projects, operations, programs, and policies included in the Plan. The 2004 PEIR serves as the informational document to inform decision-makers, agencies and the public of the potential environmental consequences of approving the 2004 RTP. The 2004 PEIR focused on broad policy goals, alternatives and program-wide mitigation measures (*CEQA Guidelines* Section 15168(b)(4)).⁴ As such, the 2004 PEIR is considered a first tier document that serves as a regional-scale environmental analysis and planning tool that can be used to support subsequent, site-specific project-level CEQA analyses.

The 2004 RTP is a long-range program that addresses the transportation needs for the six-county SCAG Region through 2030. It includes both specific projects and strategies that address transportation and potential growth patterns. Although the 2004 RTP has a long-term time horizon under which projects are planned and proposed to be implemented, federal and state mandates ensure that the Plan is both flexible and responsive in the near term. Therefore, the 2004 RTP is regarded as both a long-term regional transportation blueprint and as a dynamic planning tool subject to ongoing refinement and modification.

Section 15152 of the CEQA Guidelines indicates that subsequent environmental analyses for separate, but related, future projects may tier off the analysis contained in the PEIR. The CEQA Guidelines do not require a Program EIR to specifically list all subsequent activities that may be within its scope. If site-specific EIRs or negative declarations will subsequently be prepared for specific projects broadly identified within a Program EIR, then site-specific analysis can be deferred until the project level environmental document is prepared (Sections 15168 and 15152) provided deferral does not prevent adequate identification of significant effects of the planning approval at hand.

BASIS FOR THE ADDENDUM

This proposed RTP Amendment requires the preparation of an Addendum to the 2004 PEIR for the 2004 RTP. When an EIR has been certified and the project is modified or otherwise changed after certification, then additional CEQA review may be necessary. The key considerations in determining the need for and appropriate type of additional CEQA review are outlined in Section 21166 of the Public Resources Code (CEQA) and CEQA Guidelines Sections 15162, 15163 and 15164.

Section 21166 of CEQA specifically provides that a Subsequent or Supplemental EIR is not required unless the following occurs:

(1) Substantial changes are proposed in the project which will require major revisions of the EIR.

⁴ Unless otherwise indicated, all citations by section number are to the *CEQA Guidelines* (Cal. Administrative Code, tit. 14, Section 15000 et seq.)

- (2) Substantial changes occur with respect to the circumstances under which the project is being undertaken which will require major revisions in the EIR.
- (3) New information, which was not known and could not have been known at the time the EIR was certified as complete, becomes available.

An Addendum may be prepared by the Lead Agency that prepared the original EIR if some changes or additions are necessary, but none of the conditions have occurred requiring preparation of a Subsequent EIR (Section 15164(a)). An Addendum must include a brief explanation of the agency's decision not to prepare a Subsequent EIR and be supported by substantial evidence in the record as a whole (Section 15164(e)). The Addendum to the EIR need not be circulated for public review but it may be included in or attached to the Final EIR (Section 15164(c)). The decision-making body must consider the Addendum to the EIR prior to making a decision on the project (15164(d)).

For the reasons set forth in this Addendum, SCAG has determined that an Addendum to the 2004 PEIR is the appropriate CEQA document because the proposed changes to the Plan do not meet the following conditions of Section 15162(a) for preparation of a Subsequent EIR:

- (1) Substantial changes are proposed in the project which will require major revisions in the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.
- (2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.
- (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence, at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:
 - a. The project will have one or more significant effects not discussed in the previous EIR;
 - b. Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - c. Mitigation measures or alternative previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
 - d. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

While the proposed changes to the RTP may represent "New information of substantial importance..." as stated in 15162(a)(3), these changes to the project will not result in one or more significant effects not discussed in the previous EIR, nor result in impacts that are substantially more severe than shown in the previous EIR. Moreover, no changes to the mitigation measures contained in the 2004 PEIR are being proposed so as to trigger additional review regarding such measures. The conditions described in CEQA section 15162 subdivision (a) have not occurred. SCAG has assessed the additional projects at the programmatic level,

and finds that the projects identified in this Amendment are consistent with the analysis, mitigation measures, and Findings of Fact contained in the 2004 PEIR. Further, SCAG finds that the addition of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

PROJECT DESCRIPTION

Projects that are funded through the CMIA program must be consistent with the existing Regional Transportation Plans. As aforementioned, the purpose of this RTP Amendment is to incorporate those projects identified in the CMIA program and other non-CMIA projects seeking to take advantage of new funding opportunities or projects that require changes in their project scope, schedule, and/or funding. In addition to those, SCAG received amendment requests from Caltrans, the region's county transportation commissions, and other stakeholders. A comprehensive list of the projects can be found in this 2004 RTP Amendment Summary Table 1: Los Angeles County Projects; Summary Table 2: Orange County Projects; Summary Table 3: Riverside County Projects; Summary Table 4: San Bernardino and Ventura County.

The intention of this Addendum is to analyze any potential changes to the environmental impacts of the 2004 RTP that could occur as a result of the addition of (and changes to) those priority projects identified by the CTCs at their February 28, 2007 meeting. The following are the projects to be included in this Amendment to the RTP:

- (1) <u>New Projects</u> These projects are projects that were not included in the 2004 RTP and are being added to the existing 2004 RTP.
- (2) <u>Revised Projects</u> These projects appear in the existing 2004 RTP. They are projects being included in this RTP Amendment due to revisions to their project scopes, schedules, and/or funding.

ANALYSIS OF IMPACTS

The addition of the projects identified in this current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR. The 2004 PEIR broadly identifies a number of region-wide significant impacts that would result from the numerous transportation policies and projects encompassed by the 2004 RTP. Although the new projects identified in the current Amendment were not identified in the 2004 PEIR, SCAG has assessed these additional projects at the programmatic level and finds that they are consistent with the scope, goals, and policies contained in the 2004 RTP and evaluated in the 2004 PEIR. Further, each project will be fully assessed at the project-level by the implementing agency in accordance with CEQA, NEPA, and all other applicable regulations.

No changes to the mitigation measures contained in the 2004 PEIR are proposed. SCAG has determined that the addition of the projects identified above would result in impacts that would fall within the range of impacts identified in the 2004 PEIR. Therefore, no substantial physical impacts to the environment beyond those already anticipated and documented in the 2004 PEIR

are anticipated to result from the inclusion of the proposed projects identified in this current RTP Amendment.

AESTHETICS AND VIEWS

The 2004 RTP and PEIR included analysis at the programmatic level of various types of projects, including new facilities, goods movement roadway facilities, rail corridors, flyovers, interchanges, and Maglev. Expected significant impacts would be the obstruction of scenic views and resources, altering areas along state designated scenic highways and vista points, creating significant contrasts with the scale, form, line, color and overall visual character of the existing landscape, and adding visual urban elements to rural areas (pp. 3.6-10-3.6-22).

The proposed projects identified in this Amendment are not expected to cause significant adverse impacts to aesthetics or views beyond those already described in the 2004 PEIR. Incorporation of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

AIR QUALITY

The proposed projects identified in this Amendment are not expected to cause additional significant regional air quality impacts. The 2004 PEIR identified significant and unavoidable impacts to regional air quality, cancer risk increases, and short-term air emissions from implementation of the RTP. A conformity analysis prepared for the 2004 PEIR demonstrated that the 2004 RTP conforms to federal and state requirements, therefore having a less than significant impact on cumulative regional air quality (pp 3.4-25-3.4-44).

The regional emissions analysis performed for this RTP Amendment determined projects identified in this current Amendment would not result in an increase of established emissions budgets within the South Coast Air Basin. The incorporation of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

BIOLOGICAL RESOURCES

The proposed projects identified in this Amendment are consistent with the findings of the 2004 PEIR on biological resources. The 2004 PEIR concluded that implementation of the RTP would adversely affect biological resources and result in habitat loss, fragmentation and degradation, encroachment of non-native species, water diversion and degradation, and other human activities, such as off-road vehicle activity (pp 3.7-20 – 3 7-33).

Detailed project-level analysis, including project level mitigation measures, will be conducted by each implementing agency. The analysis in the 2004 PEIR adequately addresses the range of impacts that could result from the proposed projects at the program level. Incorporation of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

CULTURAL RESOURCES

The proposed projects identified in this Amendment are consistent with the findings of the 2004 PEIR on cultural resources. The 2004 PEIR determined that the development of new transportation facilities may affect archaeological and paleontological resources, primarily through the disturbance of buried resources. Additionally, the development of new transportation facilities may affect historic architectural resources (structures 50 years or older), either through direct affects to buildings within the proposed project area, or through indirect affects to the area surrounding a resource if it creates a visually incompatible structure adjacent to a historic structure (pp. 3.8-16 - 3.8-25).

Incorporation of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

ENERGY

The proposed projects identified in this Amendment are not expected to cause significant energy impacts beyond those identified in the 2004 PEIR. The 2004 PEIR concluded that significant impacts would result from an increase in transportation-related energy demands. Three main areas of impact have been identified: energy demands for construction and expansion of the regional transportation system; energy demands for operation of the regional transportation system as of 2030; and the cumulative impacts of growing energy demand associated with implementation of the 2004 RTP (pp. 3.11-12 – 3.11-16).

The analysis in the 2004 PEIR adequately addresses the range of impacts that could result from these projects at the program level. Incorporation of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

GEOLOGY, SOILS, AND SEISMICITY

Potential impacts on geology, soils, and seismicity resulting from the proposed projects identified in this current Amendment are consistent with the findings of the 2004 PEIR. The 2004 RTP identified that damage to transportation infrastructure can result from geologic and seismic activity, such as surface rupture, ground shaking, liquefaction, and landsliding. However, incorporation of mitigation measures proposed in the 2004 PEIR would alleviate impacts associated with seismic safety (pp. 3.9-16-3.9-22).

Detailed project level analysis, including project level mitigation measures, will be conducted by the implementing agency. Therefore, incorporation of the proposed project into the 2004 RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

HAZARDOUS MATERIALS

Potential impacts on hazardous materials from the projects identified in this Amendment are consistent with the findings of the 2004 PEIR. The 2004 PEIR concluded that the RTP would facilitate the movement of goods, including hazardous materials, through the region. The significant impacts include risk of accidental releases due to an increase in the transportation of

hazardous materials and the potential for such releases to reach schools within one-quarter mile of transportation facilities affected by the 2004 RTP (pp. 3.10-7 – 3.10-12).

The analysis in the 2004 PEIR adequately addresses impacts at the program level that could result from the projects identified in this Amendment. Incorporation of the proposed new projects and modifications to existing projects into the RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

LAND USE

Potential impacts to land use that could result from the proposed projects analyzed in this Amendment are consistent with the findings of the 2004 PEIR. The 2004 PEIR analyzed potential impacts of the 2004 RTP on land use consistency and compatibility. The 2004 PEIR concluded that the RTP would result in significant impacts regarding the loss and disturbance of agricultural lands, the loss and disturbance of open space and/or recreational lands, and inconsistencies with general plans (pp. 3.1-11- 3.1-19).

The analysis in the 2004 PEIR adequately addresses impacts at the program level that could result from the projects identified in this Amendment. Incorporation of the proposed new projects and modifications to existing projects into the RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

NOISE

Potential noise impacts from the projects identified in this Amendment are consistent with the findings of the 2004 PEIR for noise. The projects could potentially cause an increase in ambient noise levels. However, the assessment in the 2004 PEIR Noise Chapter adequately evaluates these impacts at the programmatic level and includes mitigation measures to be implemented at the project level (pp. 3.5-14 - 3.5-28). Impacts from the proposed project identified in this Amendment would be expected to fall within the range of impacts previously identified in the 2004 PEIR.

The analysis in the 2004 PEIR adequately addresses impacts at the program level that could result from the projects identified in this Amendment. Incorporation of the proposed new projects and modifications to existing projects into the RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

POPULATION, HOUSING AND EMPLOYMENT

Potential impacts to population, housing, and employment from the projects identified in this Amendment would be consistent with the findings for the 2004 PEIR. The 2004 PEIR found significant impacts would occur in the areas of growth distribution in vacant areas, displacement, community disruption, and a change in the regional growth pattern. The projects identified in this Amendment would result in relatively minor impacts to overall region-wide population, housing, and employment (pp. 3.2-10 - 3.2-17).

These impacts are within the range of impacts assessed at the programmatic level in the 2004 PEIR. Therefore, inclusion of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

PUBLIC SERVICES AND UTILITIES

The potential impacts from the proposed projects identified in this Amendment are within the range of, and consistent with the findings of the 2004 PEIR for public services and utilities of the 2004 PEIR. Anticipated significant cumulative impacts included demand for more police, fire, and emergency personnel and facilities, demand for more school facilities and teachers, an increase in households in areas subject to wildfires, and demand for additional solid waste services (pp. 3.13-9-3.13-20).

The analysis in the 2004 PEIR adequately addresses impacts at the program level that could result from the RTP with the addition of the projects identified in this Amendment. Incorporation of the proposed new projects and modifications to existing projects into the RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

TRANSPORTATION

The addition of proposed projects identified in this Amendment to the 2004 RTP is not expected to cause significant adverse impacts on region-wide transportation beyond what was analyzed in the 2004 PEIR. The 2004 PEIR utilized data from the 2030 transportation model output to present a regional analysis for the impacts of the 2004 RTP on transportation. The 2004 PEIR identifies four significant impacts from implementation of the RTP: increased Vehicle Miles Traveled (VMT); higher average delay; increased heavy duty truck delay; and a cumulatively considerable impact on counties outside the SCAG region (pp. 3.3-21 – 3.3-28).

Analysis in the 2004 PEIR adequately addressed impacts that could result from this RTP Amendment at the program level. Therefore, inclusion of the projects identified in the current Amendment to the 2004 RTP would not result in a substantial change to the region-wide impacts programmatically addressed in the 2004 PEIR.

WATER RESOURCES

The potential impacts from the proposed projects identified in this Amendment are within the range of, and consistent with the findings of the 2004 PEIR on water resources. The 2004 PEIR identified an increase in impervious surfaces as a significant adverse impact (pp. 3-12-22 – 3.12-38).

The analysis in the 2004 PEIR adequately addresses region-wide impacts at the program level that could result from the 2004 RTP with the addition of projects identified in this Amendment. Incorporation of the proposed new projects and modifications to existing projects into the RTP would not result in any additional significant impacts beyond those identified in the 2004 PEIR.

COMPARISON OF ALTERNATIVES

The proposed projects identified in this Amendment would not significantly affect the comparison of alternatives in the 2004 PEIR. This current Amendment to the 2004 RTP is within the scope of the programmatic-level comparison among the alternatives considered in the 2004 PEIR: 1) No Project; 2) Modified 2001 RTP Alternative; 3) The PILUT 1 (Infill) Alternative; and 4) The PILUT 2 (Fifth Ring) Alternative. The analysis in the Comparison of Alternatives chapter of the 2004 PEIR would not be significantly affected by the inclusion of the projects identified in this RTP Amendment. Therefore, no further comparison is required at the programmatic level.

LONG TERM EFFECTS

The addition of proposed projects identified in this Amendment to the 2004 RTP would result in impacts within the scope of the discussion presented in the long-term effects chapter of the 2004 PEIR, which includes an assessment of programmatic level unavoidable impacts. irreversible impacts, growth inducing impacts, and cumulative impacts. Unavoidable and irreversible impacts from the inclusion of the projects identified in this RTP Amendment are reasonably covered by the unavoidable and irreversible impacts previously discussed in the certified 2004 PEIR.

Any growth inducing impacts are expected to be approximately equivalent to those previously disclosed in the 2004 PEIR (pp. 5-1 - 5-14). Overall, the proposed projects analyzed in this Amendment are within the scope of the broad, programmatic-level impacts identified and disclosed in the PEIR. Thus, the proposed RTP Amendment is consistent with the findings on long-term effects in the 2004 PEIR.

CONCLUSION

After completing a programmatic environmental assessment of the proposed changes to the 2004 RTP that would result from the current Amendment, SCAG finds that adoption of the proposed projects identified in this Amendment to the 2004 PEIR would not result in either new significant environmental effects or a substantial increase in the severity of previously identified significant effects. The proposed changes, while individually quite large, are not substantial changes in the context of the region which would require major revisions to the programmatic, region-wide analysis presented in the 2004 PEIR.

Further, SCAG finds that the proposed projects do not significantly affect the comparison of regional alternatives or the potential significant impacts previously disclosed in the 2004 PEIR. As such, SCAG has assessed the proposed projects identified in this Amendment at the programmatic level, and finds that inclusion of the proposed projects would be consistent with the analysis and mitigation measures contained in the 2004 PEIR, as well as the Findings of Fact and Statement of Overriding Considerations made in connection with the 2004 RTP. Therefore, a subsequent or supplemental EIR is not required and this Addendum to the 2004 PEIR fulfills the requirements of CEQA.

PUBLIC REVIEW AND COMMENT

SCAG is required to provide a 30-day public review and comment period for the Draft Amendment. A Notice of Availability and Public Hearing was posted on the SCAG website at http://scag.ca.gov/rtp2004/2004amend/Notice Draft2004RTPAmend3.pdf on May 3, 2007, and published in major newspapers in the six-county region. The Draft Amendment was made available on the SCAG website and hard copies were provided for review at SCAG and at public libraries throughout the region. Proof of notification is included in **Attachment C** of this document. Written comments were accepted until 5:00pm June 4, 2007. All comments were directed to:

Pablo Gutierrez or Shawn Kuk Southern California Association of Governments 818 W. 7th Street, 12th Floor Los Angeles, CA 90017

or to: gutierre@scag.ca.gov kuk@scag.ca.gov

A public hearing was held at SCAG from 9:30am to 10:30am on May 21, 2007. No comments were received.

SCAG fully coordinated this amendment with the region's stakeholders through SCAG's committee and task force structure. Specifically, staff provided periodic reports regarding this amendment to the Transportation Conformity Working Group (TCWG), the Subregional Coordinators, as well as the Plans and Programs Technical Advisory Committee (P&P TAC) on several occasions. Staff also presented a status report on the Amendment to the Transportation and Communications Committee (TCC) on April 5, 2007. The Final Amendment was adopted by the Regional Council on June 7, 2007.

PAGE INTENTIONALLY LEFT BLANK

CONCLUSION

This Amendment maintains the integrity of the transportation conformity as well as the fiscal constraints of the existing 2004 RTP. Furthermore, the PEIR Addendum associated with this Amendment concludes that the proposed project changes would not result in either new significant environmental effects or a substantial increase in the severity of previously identified significant effects. Appropriate and adequate procedures have been followed in ensuring coordination of this amendment allowing all concerned parties, stakeholders and the public ample opportunities to voice concern and provide input. In conclusion, this Amendment #3 to the 2004 RTP complies with all applicable federal and state requirements, including the Transportation Conformity Rule.
